# PRICING POLICY

---

Council has adopted a number of fees and charges for the wide and varied services that it provides to the Community. In deciding who pays for goods and services and to what extent, it is necessary to determine whether the service benefits the general community and/or individuals, ie. the proportion of Community versus private benefit.

Considerations that indicate Community benefit include:

- Individuals cannot be excluded from using the goods or service (for example, parks and roads).
- Does the Community, generally, benefit from the service?
- Is there a value for future generations?
- Does the Community gain a sense of civic pride from the provision of the service?

Considerations that indicate private benefit include:

- Do benefits apply to individual users?
- Are individuals prepared to pay for the service?
- Can individuals be excluded from using the services? (for example, the sale of tickets to a concert is limited to the number of seats available).

## PRICE CATEGORIES

- A. The price for this service is to make a minimal contribution towards the cost of providing this service. The majority of costs of this service are met from general income.
- B. The price for this service is set to recover annual operating and maintenance costs, but does not contribute towards the replacement of assets in providing service.
- C. The price of this service is set to recover annual operating and maintenance costs, and to make a contribution to the replacement of assets used in providing the service.
- D. The price of these goods or services is set to generate an appropriate return on capital invested.
- E. The price charged is a refundable deposit against possible damage to infrastructure, footpaths, kerb, gutters and roadways, buildings, parks and reserves caused by adjacent development or use of facilities.
- F. The price charged for these goods or services is set by regulation.
